Work History

@Pitched Ltd
2019 – Current

Full Stack Developer

- Leveraged strong understanding of WordPress core to build over 20 custom themes with intuitive back offices and modern front-ends, viewed by thousands of visitors daily. Including a SaaS product with over 15 paid subscribers.

- Introduced and encouraged Pitched to utilize modern web technologies and methodologies such as React, Vue, Tailwind and Test Driven Development.
- Developed component libraries and web applications using React, Next or Vue; with user authentication, API integration and strong emphasis on UX.
- Designed and Developed their self-sign-up process for their booking system, increasing their online enrolment.

@Self-employed
2016 – Current

Web Developer

- Converted design assets into customizable WordPress themes, while adhering to SEO best practices.
- Translated customer requirements into technical site concepts before developing sites with required technologies.
- Built and styled new mobile-friendly websites, transitioning legacy presentations to simultaneous easy-to-use versions.
- Regularly organized meetings with clients to ensure their website would exceed their expectations.
